MINIMUM SOFTWARE AND HARDWARE REQUIREMENTS

Hardware Requirements:

Processor: Intel Pentuin Processor (similar x86 and x64 families) and equivalents. Pentium IV and above is recommended.

RAM: 128 MB. 1 GB recommended.

Hard Disk: 2 GB. 80 GB recommended.

Monitor: 800*600, 16 bit depth. 1024*768, 32 bit depth is recommended.

Software Requirements:

OS: Windows XP / Linux / Mac OS. Windows 7 is recommended.

Runtime: Java Runtime Environment (JRE) is required.

Fourier Transform Demo can be executed in Windows, Linux or Mac OS. However, Java Runtime Environment (JRE) must be installed in your computer (which is pre-installed in most cases). If you don't have it installed, the go to http://www.java.com/en/download/index.jsp and install it.

For information on how to run the application, see "instruction.pdf".
